

SEARCHING

USING THE GFS ABBREVIATIONS AND KEYWORDS

The GFS item descriptions have been standardized into a new format to make searches easier and more accurate and to make the descriptions clearer so they describe the product in question better.

The new format of the item description structure is as follows:

NOUN + ADJECTIVES + PACK SIZE + BRAND (if space permits)

The **NOUN** is a word that describes the product broadly in a general sense. The noun is always singular and spelled out in full, unless it is one of the few exceptions as a pluralized noun or an abbreviated noun (please see exception list under “*Standard Keywords To Use*”).

For example: Cabbage
Glove
Croissant
Juice

The **ADJECTIVES** further qualify what the product is – for example what kind of cabbage is it, what size of glove, is it a baked or preproofed croissant and what kind of juice is it? Some adjectives may be abbreviated – please refer to the “*Adjective Abbreviations*” list for definitions)

The **PACK SIZE** has been moved to the end of the description to allow for better searching capability on the first word noun. However, you will see descriptions still in the old format on such things as invoices and credits.

The **BRAND** has also been standardized and added to the end of many of the item descriptions so that it too can be searched on. For example, you can find the abbreviation for Maple Leaf, which is “M/LF”, and use it to search for all Maple Leaf items in the catalogue. However, sometimes the item description is so long that there is not enough room to include the brand, or sometimes the item is of a generic nature, therefore the brand is not included.

TYPES OF ABBREVIATIONS:

Please refer to the following paragraphs to help guide you with searching for items in the GFS catalogue and to find the meaning of abbreviations.

You can look up abbreviations and their definitions in three ways: by **KEYWORD** used as a first word noun, by **ADJECTIVES** used in the item description (like "alum" means aluminum), or by **BRAND** name.

The **KEYWORD** list shows how some items are listed using a general noun to describe an individual product. There are a few keywords that are used to bring together larger groups of items, or items that may be harder to search out individually because the noun may be different for each item. For example, "APPIE" will bring up all kinds of appetizers together in one search and is used as the first word in the item description. Otherwise, you may have to look up onion rings, mozzarella sticks and battered mushroom caps in separate searches. Of course you can still look up the items individually if you simply want to know which mozzarella sticks we carry. If you want a list of all the appetizers, use "APPIE. Similarly the keyword "KIDS" will bring up all kids related products together like cups, colouring books, placemats etc.

ADJECTIVES are sometimes abbreviated and are listed by Product Grouping. The Product Grouping allows you to find abbreviations that are specific to the following GFS Product Types: Chemicals, Disposables, Protein or Tabletop. The rest of the abbreviations are listed as "General" because they can apply to many different Product Types.

The **BRAND** name has been standardized and can be searched on more easily by referring to the appropriate abbreviation.

Standard Key Words to Use for Searches

This list shows some **examples of keywords** that can be used to search for different product types. It is not a complete list of all first words, but highlights items that are grouped to help bring them up together in an alpha search that may otherwise have to be searched out individually.

All **first words** in item descriptions are entered in singular and spelled out in full unless they are on the exception list below (either as a plural first word or as an abbreviated first word).

Alternate spellings for a few items can make searching difficult. A GFS Ontario standard for some of those items is included below.

<p>PLURALIZED FIRST WORDS</p>	<p><i>Note: no other first words are pluralized</i></p> <p>Matches, Staples, Shears, Bitters (Angostura), Kids</p>
